

Smart Chock

Free Standing

The "Smart Chock" is an automatic motorcycle wheel chock that you can mount on your trailer bed, pickup truck, or it can be used free standing on the floor of your garage, driveway, wherever you want it, depending on the model you choose. There are two models of "Smart Chock"; Free Standing (FVSC) or Trailer Version (TVSC). The Free Standing Version can be used in a trailer and on your garage floor, when using the optional mounting kit simply unscrew the two bolts and this wheel chock will move to wherever you need it!

The 'smart' way that "Smart Chock" works, the unique design lets you push or ride your bike into the chock. The over the center and clamping action design uses the weight of your bike to hold the front tire securely in place. No need to worry if your tire will fit this chock, it's fully adjustable. It's so secure that you could stand on our bike without it budging . . . don't believe it? Check out the video online at www.smartchock.com and see for yourself!
